

Contents

Preface.	ix
List of Contributors.	xiii
PART 1 Essentials of Clinical MR Physics	1
Chapter 1 Spins, Signals, Relaxation, and Image Formation	3
<i>Qingfei Luo and Xiaohong Joe Zhou</i>	
Chapter 2 Basic MR Pulse Sequences and Sequence Options	31
<i>Michael N. Hoff</i>	
Chapter 3 MR Acceleration Techniques and Advanced Applications.	55
<i>Suraj D. Serai and Michael N. Hoff</i>	
Chapter 4 MR Image Quality: Concepts and Optimization	79
<i>Nathan Yanasak, Anobel Maghsoodpour and Rasha Makkia</i>	
Chapter 5 MR Artifacts: The Science Behind Their Origin and the Art of Their Interpretation.	103
<i>Nathan Yanasak and Rasha Makkia</i>	
PART 2 Facility Planning, Performance Testing, and Accreditation	137
Chapter 6 MR System Overview, Site Planning, and Technical Specifications	139
<i>Krystal M. Kirby</i>	
Chapter 7 MR Performance Testing: Acceptance Testing, Annual Testing, and QC Testing	153
<i>Trevor Andrews</i>	
Chapter 8 Physicist Role in Accreditation.	163
<i>Max Amurao</i>	
PART 3 MR Safety	169
Chapter 9 Basics of MR Safety	171
<i>Krystal M. Kirby</i>	
Chapter 10 Static Magnetic Field, Siting, Ancillary Equipment.	181
<i>Max Amurao</i>	

Chapter 11	MR Safety of Time-varying Gradient Fields	189
	<i>R. Jason Stafford</i>	
Chapter 12	Radiofrequency Power Deposition in Human Tissue	203
	<i>Heidi A. Edmonson</i>	
Chapter 13	Radiofrequency Interactions for Patients with Implants.	231
	<i>Jonathan D. Edmonson</i>	
Chapter 14	Implanted Devices—MR Conditional Labeling through the Years	257
	<i>Heidi A. Edmonson</i>	
Chapter 15	Overview of Standards for Assessing MR Safety of Implants in 2025: ASTM, ISO, IEC, ANSI/AAMI	265
	<i>Jonathan D. Edmonson and Michael C. Steckner</i>	
Chapter 16	Implementing a Successful and Sustainable MR Safety Program	277
	<i>Samuel A. Einstein</i>	
PART 4	MR Protocols.	291
Chapter 17	Neuro MRI protocols	293
	<i>Lei Qin and Jeffrey P. Guenette</i>	
Chapter 18	Breast MRI Protocols	309
	<i>R. Jason Stafford</i>	
Chapter 19	Body MRI Protocols	325
	<i>Lei Qin and Alan Cubre</i>	
Chapter 20	Musculoskeletal MRI Protocols	347
	<i>Trevor Andrews and David Hitt</i>	
PART 5	Quantitative and Advanced MR	363
Chapter 21	MR Relaxometry: Fundamentals and Advanced Methods	365
	<i>Diego Hernando and Yong Chen</i>	
Chapter 22	MR-based Quantification of Fat and Iron Deposition	383
	<i>Diego Hernando</i>	
Chapter 23	Diffusion MRI.	405
	<i>Xiaohong Joe Zhou</i>	
Chapter 24	Perfusion MRI	425
	<i>Mu-Lan Jen and Ho-Ling Anthony Liu</i>	

Chapter 25	Functional MRI.	447
	<i>Ho-Ling Anthony Liu and Henry Szu-Meng Chen</i>	
Chapter 26	MR Spectroscopy	461
	<i>Samuel A. Einstein</i>	
PART 6	Emerging Technologies.	489
Chapter 27	Emerging MR Systems: B ₀ -fields and High-performance Gradients.	491
	<i>Matt A. Bernstein</i>	
Chapter 28	MR in Radiation Therapy: State-of-the-Art	505
	<i>Eric Aliotta, Can Wu, Lauren Smith, Wendy Harris, Shu Xing, Victoria Yu and Neelam Tyagi</i>	
Chapter 29	Emerging AI Technology in MRI: Reconstruction, Image Processing, Analysis, and Beyond.	543
	<i>Fang Liu, Liping Zhang, Wanyu Bian and Xingxin He</i>
